

## Water quality table

| PARAMETER            | PARAMETER STANDARDS | VALUES FOUND | WATER QUALITY<br>(EXCELLENT, GOOD, POOR) |
|----------------------|---------------------|--------------|------------------------------------------|
| Fixed residue        |                     |              |                                          |
| Hardness             |                     |              |                                          |
| Conductivity         |                     |              |                                          |
| Calcium              |                     |              |                                          |
| Magnesium            |                     |              |                                          |
| Ammonium             |                     |              |                                          |
| Chlorides            |                     |              |                                          |
| Sulphates            |                     |              |                                          |
| Sodium               |                     |              |                                          |
| Arsenic              |                     |              |                                          |
| Residual<br>chlorine |                     |              |                                          |
| Fluorides            |                     |              |                                          |
| Nitrates             |                     |              |                                          |
